

Multi-Function Transmitter for Pressure-Temperature with internal Temperature Sensor

T P S I

Main features

- Pressure measuring ranges 0...1 bar to 0...1.000 bar
- Temperature measuring range -50°C to +150°C
- Output signals for pressure 0...10 V, 0.5...4.5 V
for temperature 0.25...4.75 V
- No internal transmission media
- Precision class 0.5 %
- Highly reliable
- Protection class IP67

Applications

- Hydraulics
- Pneumatics
- Air conditioning and refrigeration (HVAC) heating systems
- Plant and automation engineering

Description

This intelligent solution combines **two transmitters** which are capable of measuring **pressure and temperature** at the same time and **independently**.

This multi-functional transmitter has excellent characteristics for its stainless steel membrane and semi-conductor thin-film technology. The stainless steel membrane is absolutely vacuum-tight, extremely burst-proof and applicable with all standard media used in hydraulics, pneumatics, etc. as far as they are compatible with stainless steel. Its robust design guarantees high reliability also in rugged environments.

The temperature is measured by means of an internal temperature sensor.
