

DIGMA Solenoid Valves Type EAV Series 700

Further development based on the EAV series 200.

This stainless steel valve series is suitable for many aggressive medium and thanks to the use of high-quality magnetic steels, offers a reliable solution for applications with the highest demands on corrosion resistance.

Another characteristic of this type of construction is the welded stainless steel plunger guide which ensures increased pressure and leakage assurance.

Solenoid coils with different performance classes enable a favourable adaptation to the diverse requirements with regard to nominal size, operating pressure, power consumption, type of voltage or permissible self-heating.

Features

- Unbeatable price-performance ratio
- Individual product developments
- Inexpensive MIM valve body
- Extremely high material strength
- NSF certified
- Flexibility in design
- Lightweight
- Smallest dimensions
- Highest product quality
- Fail-safe and durable

CHARACTERISTICS

GENERAL

Constructional design	Seat valve, rubber seals			
Product name	2/2-way solenoid valve		3/2-way solenoid valve	
Actuation	electric, direct-acting			
Product type	EAV-7..-A..	EAV-7..-B..	EAV-7..-C..	EAV-7..-D..
Function	“A” normally closed (closing with flow)	“B” normally open (closing against current)	“C” normally closed with “1”, “2” to “3” discharged (closing against current)	“D” in 0 position “1” to “2” open, “3” closed (closing against current)
Nominal diameter	DN 1.2 to DN 3	DN 1.2 to DN 1.8	DN 1.2 to DN 3	DN 1.2 to DN 1.8
Connection	ELSA push-in connection for tube/pipe 6			
Ambient temperature	0 °C to +60 °C			
Medium temperature	0 °C to +120 °C (Special designs for higher temperatures on request)			
Medium viscosity	up to approx. 20 mm²/s			
Valve body material	1.4404 (AISI 316L)			
Other inner component material	Stainless steel			
Seal material	FKM (Fluor-Rubber) (others on request)			
Mounting method	2 M4 tapped holes in valve body or using rigid pipework			
Mounting position	optional, preferably upright			
Approval	NSF/ANSI 169			
PNEUMATIC - HYDRAULIC				
Nominal pressure	up to PN 20 According to Type table. The numerical value of the nominal pressure PN signifies the permitted excess operating pressure OP in bar at 60 °C ambient temperature and 60 °C medium temperature. Insofar as two values are given, the first value refers to solenoid coils with highest electrical power consumption, the second value to that with lowest power consumption.			
Pressure range	Technical vacuum up to permitted operating pressure OP. For exceptions which refer to minimum permitted operating pressure see table.			
Flow rate	Kv-value and QNn-value according to Type table			
Medium	gaseous or liquid			
Response time	opening time: 7 - 20 ms closing time: 12 - 20 ms			
Electrical	see solenoid coils
